STATIC/CSS/STYLES.CSS LINE-BY-LINE EXPLANATION

styles.css contains the full visual system for the app: color variables, layout, auth pages, hero/search UI, listing cards, property detail page, profile menu, flash messages, footer, and responsive rules.

BASE THEME AND RESETS

Lines 1-12: define CSS custom properties for text, muted text, borders, backgrounds, accent colors, and shadows.

Lines 14-20: set border-box sizing globally and smooth scrolling on the html element.

Lines 22-28: define body margin, colors, background, font stack, and line height.

Lines 30-45: normalize links, images, and form controls.

HEADER, PROFILE, NAVIGATION

Lines 47-59: make the site header sticky with flex layout, spacing, translucent background, border, and blur.

Lines 61-79: style the profile menu trigger as a compact teal avatar button.

Lines 81-95: style hover/open states and size avatar image/initials content.

Lines 97-120: position and animate the profile popover, including hidden state behavior.

Lines 122-138: style the RoomRent brand and R brand mark.

Lines 140-151: style the main nav links and hover color.

Lines 153-165: style the data source pill shown in the header.

FLASH AND AUTH PAGES

Lines 167-200: position flash messages, style their default/error/info states, and define dismiss animation.

Lines 202-216: define the two-column auth layout and compact OTP layout.

Lines 218-229: size and space the auth panel and h1.

Lines 231-269: style auth forms, dividers, Google button, notes, muted text, and switch links.

Lines 271-276: set the auth visual background image and overlay.

Lines 278-300: style the demo OTP box and prominent OTP value.

HOME HERO AND FORM CONTROLS

Lines 302-315: create the home hero background image, overlay gradient, spacing, and height.

Lines 317-350: style hero copy, eyebrow labels, hero/detail/empty page h1s, and hero paragraph text.

Lines 352-362: create the search panel grid with responsive widths, white background, border, radius, and shadow.

Lines 364-400: style labels, inputs, selects, textareas, dimensions, padding, and focus states.

Lines 402-433: style primary buttons and secondary buttons, including hover states.

HOME CONTENT AND PROFILE DETAILS

Lines 435-461: style the three-column stats strip and its typography.

Lines 463-489: define shared section widths, spacing, section headings, and text links.

Lines 490-504: constrain the home shell and set home listing grid columns.

Lines 506-568: style profile popover inner layout, avatar frame, profile heading, profile list, and wrapping behavior.

LISTING CARDS AND EMPTY STATES

Lines 570-582: create the listing grid and card shell.

Lines 584-601: style listing images with aspect ratio, object fit, and hover zoom.

Lines 603-618: style featured tags and static tags.

Lines 620-653: style listing body, location, title height, and price text.

Lines 655-688: style metadata/detail grids and dt/dd typography.

Lines 690-706: style empty listing and empty page text states.

PROPERTY DETAIL PAGE

Lines 708-729: create the property detail hero with full-cover image and dark gradient

overlay.

Lines 731-759: position and style detail summary text and price over the hero image.

Lines 761-778: define two-column detail layout and shared property/inquiry panel styling.

Lines 780-810: style property headings, description text, detail grid, and amenities pills.

Lines 812-832: style the sticky inquiry panel, owner line, and inquiry form.

Lines 834-839: style the generic empty page layout.

Lines 841-855: style the footer and footer text.

RESPONSIVE RULES

Lines 857-885: at max-width 1040px, reduce search/listing columns and make detail layout one column.

Lines 887-964: at max-width 700px, wrap the header, reorder header items, simplify grids, resize hero headings, stack footer/auth layout, and move auth visual above the form.

Lines 966-974: at max-width 420px, stack metadata cells and lower flash messages below the wrapped header.
