TEMPLATES/VERIFY_OTP.HTML LINE-BY-LINE EXPLANATION

verify_otp.html renders the OTP verification form used after phone login or phone signup starts.

TEMPLATE SETUP

Line 1: extends base.html.

Line 3: sets the Verify OTP page title.

Line 5: starts the content block.

OTP PANEL

Lines 6-10: open the compact auth layout and display the destination phone number.

Lines 12-17: when demo_otp exists, show the demo OTP value for local development.

Lines 19-25: POST form with a six-digit numeric OTP input and submit button.

Lines 27-30: link back to login if the phone number is wrong.

Lines 31-33: close the panel, section, and content block.
